

NP MetaSuite

A complete collection of **MT4 & MT5 plugins and tools** for enhanced platform control, automation, risk management, and system performance.

NP MetaSuite empowers brokerages to streamline operations, tailor trading environments, and maintain consistent execution quality while reducing manual workload and improving overall platform efficiency.

NP MetaSuite
MT4 & MT5 plugins and tools

Inactivity Fees MT4 Plugin

Automated Fee Charging for Dormant Accounts

Inactivity Fees is an MT4 plugin designed for forex brokerages to automate the process of charging dormant accounts. The system monitors account activity, detects inactivity thresholds, and applies the configured fee automatically—ensuring consistent revenue collection and compliance with brokerage fee policies.

Get this plugin:

<https://nullpoint.io/metatrader-tools-and-plugins/mt4-inactivity-fees-plugin/>

Negative Balance Correction MT4 Plugin

Automatic Balance Reset for Stopped-Out Accounts

Negative Balance Correction is a crucial MT4 plugin for forex brokerages that want to automate the clearing of deficit balances. When accounts stop out and fall below zero, the plugin instantly applies balance corrections to prevent negative equity, enhance client protection, and reduce manual back-office workload.

Get this plugin:

Random Markup (Slippage) MT4 Plugin

Apply Randomized Slippage by Range or Volume

Random Markup (Slippage) is an MT4 plugin designed for forex brokerages to introduce controlled randomness to slippage execution. Brokers can set slippage ranges or volume-based parameters and apply them to selected clients or groups—enabling more realistic execution modeling and flexible markup strategies.

Get this plugin:

<https://nullpoint.io/metatrader-tools-and-plugins/mt4-random-markup-slippage-plugin/>

Storage Fees / Islamic Swaps MT4 Plugin

Apply Delayed Swap Charges to Swap-Free Accounts

Storage Fees / Islamic Swaps is an MT4 plugin designed for brokers offering swap-free or Islamic accounts. It automatically applies a storage fee after a configurable number of days, ensuring fair cost recovery on long-held positions while preserving the swap-free structure for short-term trades. Ideal for compliance, risk management, and operational efficiency.

Get this plugin:

<https://nullpoint.io/metatrader-tools-and-plugins/mt4-plugin-storage-fees/>

Futures Expiration Roll MT4 Plugin

Automated Contract Rollover for Future Symbols

Futures Expiration Roll is an essential MT4 plugin for forex brokerages handling Futures instruments. It automates contract expiration by assigning expiry dates to Futures symbols and adjusting open trades using rollover points. This ensures accurate pricing, seamless contract transition, and hassle-free trade management for both brokers and clients.

Get this plugin:

Equity Leverage Limiter MT4 Plugin

Automatic Leverage Adjustment by Equity Levels

Equity Leverage Limiter is an advanced MT4 plugin that dynamically modifies account leverage based on equity levels set by the broker. When an account crosses specific equity thresholds, the system instantly applies the new leverage settings—enhancing risk management, regulatory compliance, and exposure control across the trading environment.

Get this plugin:

<https://nullpoint.io/metatrader-tools-and-plugins/mt4-equity-leverage-limiter-plugin/>

Trade History Compressor MT4 Tool

Consolidate Closed Trades to Reduce Server Load

Trade History Compressor is an MT4 tool engineered to optimize server performance by compressing large amounts of trade history. It merges multiple closed trades into one consolidated record for a selected time period, reducing database load, improving response times, and stabilizing MT4 servers handling heavy trading volumes.

Get this tool:

Swaps Uploader MT4 Tool

Bulk Swap Value Updates via CSV Import

Swaps Uploader is a powerful MT4 tool designed for forex brokerages to streamline swap rate management. With CSV-based bulk upload capability, brokers can instantly update long and short swap values for multiple symbols at once, improving accuracy, reducing manual workload, and ensuring fast synchronization across the MT4 server.

Get this tool:

<https://nullpoint.io/metatrader-tools-and-plugins/mt4-swaps-uploader-tool/>

Web API MT4 Tool

Web API is a powerful MT4 tool that enables seamless communication between your MT4 server and any external system, including CRMs, Client Areas, payment platforms, back-office portals, and custom applications. Through a secure and flexible API framework, brokers can automate and streamline essential operational tasks, synchronize client data, and build fully integrated, modern brokerage workflows. This significantly reduces manual workload while enhancing accuracy, efficiency, and scalability across the entire MT4 infrastructure.

Key Features

- Account Creation & Editing — Automatically create new trading accounts or update existing ones from external systems.
- Deposits & Withdrawals — Trigger balance operations directly via API, enabling integrated funding flows.
- Password Resets — Reset trading account passwords securely through connected systems.
- Balance & Equity Checks — Retrieve real-time account data for CRMs, Client Areas, and automated monitoring tools.
- Flexible Integration — Connect with any third-party or in-house application that supports API communication.
- Operational Automation — Reduce manual admin tasks by automating routine account and funding processes.
- Secure API Calls — Built with authentication and access controls to protect sensitive data and operations.
- Scalable Architecture — Designed to support high-volume broker environments with large client bases.

Negative Balance Correction MT5 Plugin

Automatic Deficit Clearing for Stopped-Out Accounts

Negative Balance Correction is an essential MT5 plugin for forex brokerages offering negative balance protection. When an account is stopped out and the equity falls below zero, the plugin instantly offsets the negative balance, bringing the account back to zero. This ensures compliance with client protection standards, reduces manual intervention, and enhances overall operational efficiency.

Get this plugin:

<https://nullpoint.io/metatrader-tools-and-plugins/mt5-negative-balance-correction-plugin/>

Equity Leverage Limiter MT5 Plugin

Automatic Leverage Adjustment by Equity Levels

Equity Leverage Limiter is an advanced MT5 plugin that gives forex brokerages granular control over account leverage. By monitoring real-time equity values, the system applies new leverage settings whenever thresholds are crossed—helping brokers manage exposure, comply with regulatory requirements, and maintain consistent risk governance. This automation eliminates manual intervention and ensures leverage always aligns with the client's equity level.

<https://nullpoint.io/metatrader-tools-and-plugins/equity-leverage-limiter/>

Storage Fees MT5 Plugin

Apply Delayed Swap Charges to Swap-Free Accounts

Storage Fees is an MT5 plugin designed for forex brokerages offering swap-free or Islamic accounts. The plugin automatically begins charging swap or storage fees after a configurable number of days, giving brokers flexible control over how long positions remain swap-free. This helps align account offerings with internal risk, cost-recovery, and compliance policies while maintaining a clear and transparent fee structure for clients.

Get this plugin:

<https://nullpoint.io/metatrader-tools-and-plugins/mt5-plugin-storage-fees/>

Inactivity Fees MT5 Tool

Automated Fee Charging for Dormant Accounts

Inactivity Fees is an MT5 tool designed for forex brokerages that want to automate the process of managing dormant accounts. The system tracks account activity, identifies when an account has exceeded the configured inactivity threshold, and applies the appropriate fee automatically. This ensures consistent enforcement of brokerage policies, improved operational efficiency, and accurate revenue collection.
